

166.RGBRF.RC1

RGB/RGBW WIRELESS RECEIVER

SPECIFICATION

Voltage	3.6Vdc
Max Load Current	3/4/5 x 5A
Power	3/4/5x(60~180)W
Operation Frequency	434MHz/868Mhz
Product Tech	Radio Frequency
Dimensions	140 x 48 x 17mm
IP	IP20
Remarks	3pcs AAA batteries

PRODUCT DESCRIPTION

This indoor LED controller offers intuitive, user-friendly control for dynamic lighting setups. It allows for management of up to 6 zones, with 6 customizable scenes per zone, perfect for creating tailored lighting environments.

Equipped with 10 preset changing modes and a pause function, this controller provides seamless RGB colour adjustment and a full spectrum of options with its press-button RGBW interface, enabling direct selection of Red, Green, Blue, and White.

The synchronization function ensures uniform pattern changes across all zones, and individual dimming of each R, G, B, and W channel allows for mixing millions of colours. Available in three-channel and four-channel versions, this controller brings versatility and precision to LED lighting control.
