

Fort Feeder Pillars

PRODUCT DESCRIPTION

The FORT range is a galvanized steel enclosure built for strength and security in outdoor environments. Featuring a powder coat option for aesthetics, it boasts a fully treated 12mm external grade plywood backboard and cast stainless steel block hinges for enduring performance.

The IP55 sealed, recessed door with twin tri-head locks (alternative options available) offers superior protection, while the detachable root simplifies installation and maintenance.

A heritage option is also available to seamlessly integrate with traditional architecture.

A full range of feeder pillars can be supplied to suit individual requirements.

Pillars to specific sizes can be made to order – mini, single or double.

Sentinal Cut-Out

PRODUCT DESCRIPTION

The SENTINEL safety cut-out is designed and manufactured to meet the strict standards of BS7654, guaranteeing reliable operation and superior safety for your street lighting infrastructure. Built for simplicity and durability, the SENTINEL prioritizes both ease of use and long-lasting performance.

The SENTINEL features double pole, single fuse cut out, complete with earth block and brass plate with 2 x 20mm holes.
