

Regal

PRODUCT DESCRIPTION

The REGAL is a sophisticated emergency exit sign that seamlessly blends style and functionality. Its minimalist design, featuring a slim profile and welded steel housing, creates a contemporary aesthetic that complements any interior space. The sign's bright, evenly illuminated safety panel ensures maximum visibility, providing clear guidance in emergency situations.

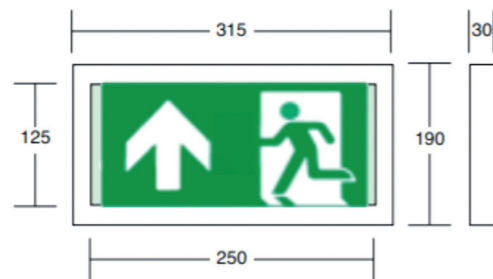

Designed to be significantly smaller than traditional fluorescent exit signs, REGAL offers greater installation flexibility without compromising performance. It delivers a generous 25-meter viewing distance, guaranteeing effective illumination in critical areas. The luminaire's user-friendly installation process involves a simple back plate mounting system with keyhole slots or 20mm BESA entry, followed by the effortless attachment of the front cover using a single fixture.

Finished in textured white, the REGAL offers customization options to match diverse interior design preferences. To enhance system integration and maintenance efficiency, the luminaire is available with DALI and self-test functionalities

FEATURES

-  Ingress Protection **IP20**
-  Colour Temperature **4000k**
-  Legend Viewing Distance **25m**
