V112

PRODUCT DESCRIPTION

V112 COMPACT BROKER - an ultra-compact DALI-2 Application Controller designed to offer seamless control for small to mid-sized room and area lighting installations. The V112 is powered directly via the DALI line and can manage up to 64 DALI-compatible control gear devices. Engineered for flexibility, the V112 can be easily integrated behind a wall-mounted push-button interface or fitted directly into luminaires for both stand-alone and networked lighting control applications.

Despite its minimal footprint, the V112 delivers powerful functionality, supporting the full range of Tridonic DALI and DALI-2 control gear, as well as DALI-certified devices from other manufacturers. The unit features four independent inputs for connecting floating contacts or standard momentary switches, offering simple yet versatile control options.
