V114

PRODUCT DESCRIPTION

V114 BRIDGE - A compact and versatile Casambi-ready wireless control module designed for efficient lighting management. This module offers wireless control via an Android or iOS smart device, eliminating the need for an external gateway. It forms a mesh network with up to 250 nodes, enabling seamless integration and control. With its small form factor, it can be easily installed in luminaires.

The module features a digital standalone DALI output and offers one independent push-button input. Additionally, it provides easy-to-use RGB and colour temperature controls and allows for over-the-air firmware updates. With a 5-year warranty, this module ensures reliable and long-lasting performance.
