

V311

PRODUCT DESCRIPTION

V311 PIR Sensor - a reliable ceiling-mounted motion detector designed for indoor use, offering a full 360° detection area. Ideal for installation in suspended ceilings, it provides one channel for light switching with zero-crossing technology to ensure long-lasting performance.

Simple to operate via remote control (required), the V311 is supplied ready-to-use with practical factory settings, including high detection sensitivity, a 3-minute follow-up time, and a 500 lux switch-on threshold. Accessories for both surface and flush mounting are available, making it a versatile solution for different installation needs.

Cost-effective and easy to integrate, the V311 PIR Sensor is perfectly suited for everyday applications such as corridors, hallways, staircases, toilets, and equipment rooms, delivering dependable and energy-efficient lighting control.
