

# V313

Sensor housing for  
surface mount  
F66.PIR.SB

## PRODUCT DESCRIPTION

**V313 WIRELESS PIR SENSOR** – A wireless sensor is a valuable addition to the Veri-Fi 360 series, This Casambi ready ambient light sensor is a versatile and reliable control solution for indoor lighting applications. This sensor offers ambient light-dependent control and presence detection, providing intelligent and energy-efficient lighting solutions. It is fully compatible with networks supporting up to 250 nodes (compatibility to be confirmed). These devices automatically form a secure wireless mesh network, allowing for the control of numerous fixtures from any location.

Powered by mains, this sensor features mounting options for suspended and solid ceilings. Its passive infrared sensor technology, combined with included shutters, ensures optimal detection. It is ideal for individual offices, open-plan offices, training rooms, corridors, passageways, and garages.
