

# V315

## PRODUCT DESCRIPTION

**V231 WIRELESS MOTION SENSOR** - a wireless HF detector offering simple, cost-effective motion detection and daylight-based control. It can be wirelessly controlled (Casambi Ready), forms a mesh network with up to 250 nodes, and allows for adjustable profiles (relay or sensor).

The sensor detects motion through glass and thin materials, features a bright-out function with customizable settings, and can be installed in enclosed luminaires up to 5 meters high.
