V342

PRODUCT DESCRIPTION

V342 WIRELESS SWITCH INTERFACE – A Casambi Ready Battery-Powered Wireless Wall Switch offers a versatile and wireless control solution. The basicDIM Wireless User Interface offers exceptional flexibility in interior design by eliminating the need to consider wiring or switch placement when rearranging furniture or remodelling walls. The switch can be located anywhere the user desires, providing direct access to all essential V360 lighting control features.

This switch forms a mesh network with up to 250 nodes (compatibility to be confirmed), allowing for seamless control of all basic DIM Wireless devices. With its intuitive design, users can easily create four custom scenes, adjust lighting levels, and control colour temperature.

Backed by a 5-year warranty, this switch provides reliable and long-lasting performance.
