

V343

PRODUCT DESCRIPTION

V343 Touchpanel - combines modern design with powerful functionality for DALI lighting systems. Featuring a sleek capacitive interface with a real glass display, it offers a high-quality appearance while enabling intuitive control. Powered directly via the DALI line, the panel supports multiple control modules within the same system and includes double terminals for simple through wiring.

Lighting groups can be easily adjusted using the “Group” rotary switch, while the “Scene” rotary switch allows individual setup of start numbers for lighting scenes, making the V343 a flexible and user-friendly solution for advanced lighting control.
