

V344

PRODUCT DESCRIPTION

V344 Touchpanel - combines contemporary design with advanced functionality for DALI lighting systems. With its sleek capacitive interface and real glass display, it delivers a premium look while ensuring intuitive operation. Powered directly via the DALI line, it supports multiple control modules within the same system and features double terminals for straightforward through wiring.

In addition to group and scene adjustment via dedicated rotary switches, the V344 also provides Tunable White (colour converter) control, allowing precise adjustment of colour temperature along the Planckian Locus (Tc). This makes it possible to create tailored lighting environments that enhance comfort, productivity, and wellbeing.

Stylish, versatile, and user-friendly, the V344 Touchpanel is the perfect solution for advanced DALI lighting control.
