

V345

PRODUCT DESCRIPTION

V345 Dali Scene Plate - a single channel controller for DALI or DSI devices. The product has the following controls.

Four buttons that offer 4 lighting levels. The default levels are:

- 1 - 100% brightness
- 2 - 75% brightness
- 3 - 50% brightness
- 4 - 25% brightness

These levels can be easily changed, see below. Raise and lower function Use either buttons 1 and 2 to raise the light level. Use either buttons 3 and 4 to lower the light level.

Off button Toggle between lights off and last selected Scene. Note: the data sent from the DALI output is in broadcast mode and is not suitable for addressed systems.
